

DIGITAL TRANSFORMATION WITH SAP ERP S/4HANA STARTER PACKAGE

BACKGROUND

Digital transformation initiatives to accelerate more digitalized customer business, the more continuity can ensure when facing future global crises.

SAP ERP S/4HANA Starter Package is designed to help small & midsize customers build their technical and business plans and start their journey to SAP S/4HANA.

In this package, we will introduce a new way of how a company can make break-thru action with small starting investment to reach better operation excellence and efficiency, by deploying the latest SAP technology. By nature you can start from the very minimum investment, but later-on the system can scale up at the pace of your business growth.

SOLUTION

SAP S/4HANA is the market leading intelligent ERP that helps organizations in all industries achieve unparalleled business agility, enabling them to meet ever-rising customer expectations, deliver new products and services, and manage resources more efficiently in an era of increasing market and regulatory demands.
